Measuring Tool

Search By Coordinates

Map legend. Shows a legend of all layers that are currently drawn.

Layer list button. From this tab, you can choose which layers will be displayed on the map.

Search by parcel number, owner name (last, first), and address in this box.

Default View

Zoom in or out. You can also zoom with the wheel on your mouse.

'My Location' tool. Adds a point on the map to track your current location. Works best with a cell phone.

Scale Bar

Coordinates tool. Click this button and then click on the map to get coordinates for that point.

Click on this tab to reveal the attribute table for all layers.
